THEME I: CHRONIC PAIN

- 9:00am - 9:45am Genetics in pain susceptibility
9:45am - 10:30am Chronic facial pain management
10:30am - 10:45am *BREAK*
10:45am - 11:30am Neurosurgery for intractable facial pain
11:30am - 12:00pm Panel Discussion Q and A
12:00pm - 1:00pm *LUNCH*

THEME II: PHARMACOTHERAPEUTICS

- 1:00pm - 1:45pm Common medications in dentistry
1:45pm - 2:00pm *BREAK*
2:00pm - 2:45pm Common adverse drug reactions in dentistry
2:45pm - 3:30pm Medical management of chronic daily headache and medication-overuse headache
3:30pm - 4:00pm Panel Discussion Q & A

Saturday, November 22, 2008

**THEME III: BISPHTHONATES ASSOCIATED
OSTEONECROSIS OF JAWS (BONJ)**

- 9:00am - 9:45am History and risk assessment
9:45am - 10:30am Role of biofilms in BONJ
10:30am - 10:45am *BREAK*
10:45am - 11:30am Clinical presentation and management
11:30am - 12:00pm Panel Discussion Q & A
12:00pm - 1:00pm *LUNCH*

**THEME IV: ORAL CANCER TREATMENT AND
COMPLICATIONS**

- 1:00pm - 1:45pm Advances in radiation therapy for oral cancer
1:45pm - 2:00pm *BREAK*
2:00pm - 2:45pm Radiation contracture, trismus & oral infections in cancer patients
2:45pm - 3:30pm Oral mucositis
3:30pm - 4:00pm Discussion Q & A and Conclusion

**USC International
Oral Medicine
Symposium:
Where Dentistry Meets
Medicine**

USC School of Dentistry
Friday - Saturday,
November 21 - 22, 2008
9:00 a.m. - 4:00 p.m.

Welcome to the USC International Oral Medicine Symposium where Dentistry meets Medicine. The University of Southern California School of Dentistry has decided to start yet another tradition of excellence by holding the first major 2-day symposium assembling the best experts in the varied disciplines of Oral Medicine, Orofacial Pain, Chronic Pain Management, Radiation Oncology, Neurology, Neurosurgery and Microbiology from the USC School of Dentistry, USC Keck School of Medicine, and the National Institutes of Health (NIH). The program will focus on a wide range of topics under four major themes: Chronic Pain, Pharmacotherapeutics, Bisphosphonates Associated Osteonecrosis of the Jaws and Oral Cancer Treatment and Complications.

These unique themes deal with conditions requiring multidisciplinary management and hence will have significant educational value for dentists, physicians, specialists, dental hygienists and medical nurses and auxiliaries. This symposium will also address the latest research and clinical scenario of Bisphosphonates associated osteonecrosis of the jaws.

Glenn Clark, DDS, MS

(Symposium Chair)

Professor and Program Director, Orofacial Pain and Oral Medicine Center, USC School of Dentistry.

Topic: Common Medications in Dentistry

Satish Kumar, DDS, MS

(Symposium Co-Chair)

Assistant Professor of Clinical Dentistry Director, Oral Radiology, USC School of Dentistry.

Topics: BONJ: Clinical Presentation & Management; Oral Mucositis

Steven Richeimer, MD

Associate Professor of Clinical Medicine, Chief of the USC Division of Pain Medicine and Director of the Norris Cancer Hospital Palliative Medicine Service, USC Keck School of Medicine.

Topic: Chronic Facial Pain Management

William Costerton, PhD

Professor of Research, Founder and Former Director of the Center for Biofilms, USC School of Dentistry.

Topic: Role of Biofilms in BONJ

Parvesh Kumar, MD

Professor and Chair, Department of Radiation Oncology, USC Keck School of Medicine.

Topic: Advances in Radiation Therapy for Oral Cancer

Soma Sahai-Srivastava, MD

Assistant Professor of Clinical Neurology, Director, Neurology Ambulatory Clinics, LA County Hospital, USC Keck School of Medicine.

Topic: Medical Management of Chronic Daily Headache and Medication-Overuse Headache

Raymond Dionne, DDS, PhD

Bethesda, Maryland.

Topic: Genetics in Pain Susceptibility

Mahvash Navazesh, DMD

Professor and Chair, Division of Diagnostic Sciences, Associate Dean of Academic Affairs and Student Life, USC School of Dentistry.

Topic: Common Adverse Drug Reactions in Dentistry

Parish Sedghizadeh, DDS, MS

Assistant Professor of Clinical Dentistry, Assistant Director, Oral Medicine Center. Director, Center for Biofilms, USC School of Dentistry.

Topic: BONJ: History & Risk Assessment

Steven Giannotta, MD

Professor and Chair, Department of Neurological Surgery, USC Keck School of Medicine.

Topic: Neurosurgery for Intractable Facial Pain

Saravanan Ram, DDS, MS

Assistant Professor of Clinical Dentistry, Assistant Director, Orofacial Pain Center, USC School of Dentistry.

Topic: Radiation Contracture, Trismus & Oral Infections in Cancer Patients
