# SNORING, OBSTRUCTIVE SLEEP APNEA & MANDIBULAR ADVANCEMENT DEVICES

Friday - Saturday, April 2 - 3, 2004 • 8:30 a.m. - 5:00 p.m.

## A WORKSHOP COURSE

14 Hours of Continuing Education

### Glenn Clark, DDS, MS

Professor, Division of Diagnostic Sciences and Director of Orofacial Pain & Oral Medicine Center, USC School of Dentistry. Dr. Clark is a recipient of the 2002 Pierre Robin Award for Excellence in Sleep Research presented by the Association of Dental Sleep Medicine.

### Jack Broussard, DDS

Assistant Clinical Professor, Division of Diagnostic Sciences and Director of USC Oral Health Center, USC School of Dentistry.

## Synopsis

This course focuses on Sleep Disordered Breathing Disorders (Snoring, Somnolence and Sleep Apnea). It reviews the underlying mechanisms of these problems, including brain and anatomic alterations that predispose a patient to SDB. Lectures include an explanation of airway closure, factors that predict or predispose to airway closure and the medical and psychological consequences of sleep disordered breathing. Since a dentist must be able to order and interpret polysomnographic reports and understand various treatment options, these issues will be discussed extensively. This course also provides detailed demonstrations of various appliances that can be used to treat patients. The second day involves a presentation of several cases that illustrate all of the common treatment methods used for SDB. Case histories and polysomnographic data from five SDB cases will be presented and discussed in this course!

## Upon completion of this course you will be able to:

- Understand the anatomy, physiology and pathobiology of the obstructive sleep apnea
- Understand diagnostic methods that are used to detect and quantify obstructive apnea disorders
- Understand the current therapies used for these problems
- Understand the latest medications that are used for managing both snoring and obstruction
- Understand how to make a modified Herbst device and a TAP device for OSA and snoring
- Understand how to use portable take-home recording devices for assessing the ongoing success or failure of your treated cases

## Topics to be covered:

- Chronic Snoring
- Chronic Obstructive Sleep Apnea
- Ordering and Interpreting 3-D Airway Images
- Medications used in OSA
- Examination methods for OSA/Snoring
- Sleep strips for recording airflow during sleep
- Bite Strips for recording bruxism during sleep
- Ordering Polysomnography
- Take-home Oximetry/Peripheral Arterial Tonometry

This course is part of a series of courses that are being provided by the faculty of the newly established USC Center for Orofacial Pain and Oral Medicine.

## Registration Fees

### Before March 15, 2004

Dentist: \$395 • Auxiliary: \$195

### After March 15, 2004

Dentist: \$425 • Auxiliary: \$215
