8:30 a.m. - 5:00 p.m.

SPEAKERS

Charles Shuler, DMD, PhD

Associate Dean, Student Life and Academic Affairs.
Director, Center for Craniofacial Molecular Biology.
George and Mary Lou Boone Chair of Craniofacial
Molecular Biology.

Parish Sedghizadeh, DDS, MS

Assistant Professor, Division of Diagnostic Sciences.
Diplomate, American Board of Oral and
Maxillofacial Pathology.

Mahvash Navazesh, DMD

Associate Professor and Chair,
Division of Diagnostic Sciences.

Glenn Clark, DDS, MS

Professor, Division of Diagnostic Sciences.
Director, Orofacial Pain & Oral Medicine Residency
Program and Center.

SYNOPSIS

This is a case-based course and is intended to give clinicians a practical and logical approach to oral diagnosis. It begins with a review of the principles of soft and hard tissue lesion identification and management. The course will also cover salivary disease and chronic facial pain. It would be particularly useful for general dentists, dental specialists, dental hygienists and other oral health care professionals. This course represents a great opportunity to brush up your diagnostic skills, gain insight into modern management techniques and principles, or acquire new areas of expertise that can be applied to your own clinical practice. We look forward to your participation!

Topics to be covered:

1. CLINICAL ORAL PATHOLOGY

Charles Shuler

- Identify oral lesions
- Create a differential diagnosis
- Establish a definitive diagnosis
- Participate in management

2. RADIOGRAPHIC ORAL PATHOLOGY

Parish Sedghizadeh

- Recognize radiographic pathology
- Characterize radiographic lesions
- Interpret findings from conventional imaging studies
- Interpret findings from advanced imaging studies
- Protocol for diagnosis or referral

3. SALIVARY GLAND DISORDERS

Mahvash Navazesh

- Distinguish xerostomia from salivary gland dysfunction
- Establish risk factors
- Recognize signs and symptoms
- Perform diagnostic work up
- Interpret diagnostic tests results
- Have a team approach to the treatment

4. OROFACIAL PAIN DISORDERS

Glenn Clark

- Examination methods for chronic orofacial pain disorders
- Recognizing temporomandibular disorders (TMD)
- Testing for Chronic Orofacial Neuropathic Pain
- Headache disorders which mimic TMD
- Medications used in pain therapy

Upon completion, participants should understand the following components of clinical decision-making with respect to oral disease:

- Approaches to lesion recognition in the orofacial region
- Principles of differential diagnosis
- Techniques for definitive diagnosis
- Concepts of treatment
- Considerations in management
- Indications for referral

REGISTRATION FEES

Before April 8, 2005

- Dentist: \$195
- Auxiliary: \$115 (Limited 2 per dentist)

After April 8, 2005

- Dentist: \$225
- Auxiliary: \$135 (Limited 2 per dentist)
