Friday - Sunday, November 19 - 21, 2004

- 
- *Lectures*
 - *Hands-on surgical and restorative workshops*
 - *Live implant surgery and restoration*

Three weekends that will change your practice

USC Comprehensive Surgical & Restorative Implant Training Program

Impant dentistry has become an integral part of clinical practice. Whether you plan to focus on implant placement or restoration, comprehensive training in both surgical and restorative aspects is the most effective program to advance your clinical skills.

This course is appropriate for any clinician who is interested in gaining a comprehensive training in implant dentistry:

- ♦ Beginners with limited implant knowledge
- ♦ Surgeons who would like to have better understanding of implant restoration
- ♦ Restorative dentists who would like to have better understanding of implant surgery

This course will be followed by two other optional courses:

- ♦ Advanced implant surgery
- ♦ Advanced implant restoration

The USC Comprehensive Surgical and Restorative Program features world-renowned faculty with expertise in implant surgery, prosthodontics, anatomy and practice management. The small group setting in the state-of-the-art facility of the University of Southern California School of Dentistry will provide course participants with a unique educational opportunity.

Homayoun Zadeh, DDS, PhD
Course Director

Yang Chai, DDS, PhD

Associate Professor at the University of Southern California School of Dentistry. Dr. Chai completed his dental education and earned his PhD degree in Craniofacial Biology at USC. He previously obtained his dental degree and post-doctoral training in Oral-Maxillofacial Surgery at the Beijing Medical University, Beijing, China. He is engaged in active NIH-funded research at the Center for Cell and Molecular Biology (CCMB) at USC, focusing on craniofacial development. He has published extensively in peer-reviewed journals and book chapters. Dr. Chai received numerous awards, including several Awards of Excellence in Teaching at USC.

Topic: Anatomy of Implant Sites

Fereidoun Daftary, DDS, MScD

Dr. Daftary received his dental education from the National University of Iran and completed his post-graduate training in prosthodontics at Boston University. Later he served as Chair of the Department of Fixed Prosthodontics at the University of Southern California School of Dentistry and also held a position as an Assistant Professor at New York University. Dr. Daftary is a frequent lecturer at national and international meetings. He has also developed and patented many implant components, including the Anatomic Implant System (AIS) and Bio-Esthetic abutment. He is an educator, clinician, researcher, innovator, author and lecturer. His current research focuses on improving implant esthetics and function. Dr. Daftary maintains a private practice limited to prosthodontics and implant dentistry in Beverly Hills, California.

Topic: Implant Restoration

Baldwin W. Marchack, DDS, MBA

Dr. Marchack graduated from USC School of Dentistry in 1971 and received his MBA from UCLA in 1989. He belongs to numerous professional organizations, including the American Prosthodontic Society, the Academy of Prosthodontics, the Pacific Coast Society for Prosthodontics, the International College of Prosthodontists, the Academy of Osseointegration and the American Academy of Esthetic Dentistry. He is a Fellow of the American College of Dentists, a Fellow of the International College of Dentists, a Fellow of the Pierre Fauchard Academy, and a Fellow of the Academy of General Dentistry. He is the author of numerous articles and has presented over 200 lectures nationally and internationally. He currently serves on the Executive Council of the Pacific Coast Society for Prosthodontics, on the Board of Councilors of the USC School of Dentistry, and is President-Elect of the American Academy of Esthetic Dentistry and the Vice-Chairman of the Editorial Council for the Journal of Prosthetic Dentistry. He maintains a private practice emphasizing on restorative and implant dentistry in Pasadena, California.

Topic: Implant Marketing & Promotion

Christopher B. Marchack, DDS

Associate Clinical Professor at the USC School of Dentistry. Dr. Marchack graduated from the University of Pacific School of Dentistry and received his prosthodontic certificate in 1992 from the USC School of Dentistry. He belongs to numerous professional organizations, including the Pacific Coast Society of Prosthodontists, the American College of Prosthodontists, the Academy of Osseointegration, the

Academy of Prosthodontics, the San Gabriel Valley Dental Implant Study Club and the Southern California Osseointegration Study Club. He is the founder and current director of the San Gabriel Valley Dental Implant Study Club and the co-director of the USC School of Dentistry New Odontic Seminar. Dr. Marchack has written numerous articles in peer-reviewed journals, relating to the restorative aspects of implant dentistry. He is on editorial review board of the Journal of Prosthetic Dentistry and Quintessence International and has lectured both nationally and internationally. He has been interviewed on several local and national television news programs pertaining to dental procedures. He has a full-time practice in Pasadena, California.

Topic: Implant Restoration

Corporate Partners

Richard M. Sullivan, DDS

Dr. Sullivan is Clinical Director for Nobel Biocare USA in Yorba Linda, California. He completed the two-year Harvard University Seminars in Implant Dentistry Program in 1988, and later provided implant placement, restoration and dental laboratory aspects of implant dentistry as a general dentist. Since 1990, he has worked with Nobel Biocare in several capacities, including a two-year relocation to the

international headquarters in Gothenburg, Sweden. Dr. Sullivan has provided osseointegration programs at universities and professional associations across the country, emphasizing streamlined practical approaches to the results achievable with implant-supported dental restorations as compared to other forms of dentistry. Dr. Sullivan is a Fellow of the Academy of Osseointegration and has served as Chairman of the Professional and Public Relations Committee.

Topic: Implant Restoration Hands-on

G. HARTZELL & SON
MANUFACTURERS OF DENTAL AND SURGICAL INSTRUMENTS

Homayoun Zadeh, DDS, PhD

Associate Professor and Chair of the Periodontology Section, USC School of Dentistry. Dr. Zadeh received his doctor of dental surgery degree from USC School of Dentistry in 1987. He also completed advanced clinical education in Periodontology and earned a PhD degree in immunology from the University of Connecticut Schools of Dental Medicine and Medicine. Funded by the National Institutes of Health, Dr. Zadeh

is leading a research team to investigate the mechanisms of periodontal diseases. He has an extensive publication track and serves as editorial reviewer for several scientific journals. His clinical research interests involve studies on minimally-invasive surgery and novel esthetic implant designs. Dr. Zadeh is the director of USC Periodontal and Implant Symposium. He also maintains a private practice limited to periodontology with emphasis on esthetic periodontal and implant reconstruction.

Topic: Implant Surgical Placement

Registration Fees

Before August 15, 2004

Dentist: \$2,950
Allied Professionals (RDH, RDA, CDT): \$895

After August 15, 2004

Dentist: \$3,150
Allied Professionals (RDH, RDA, CDT): \$955

- 60 Hours of Continuing Education •
- Limited Attendance •

Curriculum

The replacement of missing teeth with a cemented implant restoration is now experiencing explosive growth in the United States. The dental profession is beginning to understand that implant restorations may actually be the most conservative treatment available compared to traditional alternatives for addressing tooth loss. In addition, recent demographic data shows that the number of people with fully edentulous arches has increased over the past 20 years despite advances in dentistry. Dental implant retained restoration will be an important service for many practices.

This course will combine lecture presentations, small group hands-on sessions and live patient care to provide a comprehensive experience in implant dentistry. The objective is to provide the attendee with streamlined practical approaches representing the latest treatment concepts.

Topics to be covered:

Conceptual topics

- Biologic basis of Osseointegration
- Anatomy of implant sites and surrounding structures

Diagnosis and treatment planning

- Treatment planning & case selection
- Diagnostic tools: radiographs, CT scan tomography and surgical guide, computer-generated guide

Surgical placement of implants

- Surgical considerations and treatment planning
- Hands-on workshop: participants will place implants in models
- Live surgery: participants will observe implant placement in patients

Implant restoration

- Implant restorative options
- Implant impression techniques
- Hands-on restorative workshop
- Live patient: participants will observe implant restorative techniques in patients
- Abutment selection: prefabricated abutments, computer-designed abutments and ceramic abutments
- Immediate vs. staged implant placement
- Immediate vs. staged implant loading
- Provisional placement: immediate vs. staged

Laboratory techniques and procedures

Marketing and promotion

- Incorporating implant dentistry in a surgical or restorative practice
- Case presentation
- Fee schedule determination

A 9-day program presented over three weekends

Friday - Sunday, September 10 - 12, 2004

Friday - Sunday, October 15 - 17, 2004

Friday - Sunday, November 19 - 21, 2004
