FREE to All

RSVP at (213) 740-0428 or send back the registration form

**Game kickoff for USC vs. Washington State begins at 12:30 pm (subject to change) at the Los Angeles Memorial Coliseum. The School of Dentistry is unable to provide football tickets. Tickets for the game can be purchased from the USC Ticket Office 213-740-GOSC*

**For questions concerning the Homecoming Reception or Open House, please contact the Office of Development at (213) 740-0428.*

A graphic for the Homecoming event. It features a background image of the USC School of Dentistry building with trees in the foreground. Overlaid on the image are several text elements: a circular graphic with "1897" in the top right, the year "2005" in large red letters on the right, and the word "Homecoming" in a stylized font across the middle. At the bottom, there are three columns of text detailing the event schedule.

USC SCHOOL OF DENTISTRY:

CELEBRATING *THE PAST*,

SHAPING *THE FUTURE*

Dear Trojan Dental Community,

I want to welcome you to a “must attend” experience. “Celebrating the Past, Shaping the Future” will bring our community together in Bovard Auditorium on USC’s University Park Campus to reflect upon what has been, what is, and what could be. We will experience the remarkable human capital that is the signature of USC and will hear from deans and faculty who have made such an enormous difference in the school’s history from the late 1940s to the present and beyond.

Over the last 108 years the USC School of Dentistry has earned the respect and admiration of millions of people in California, around the nation, and beyond. USC graduates have shaped the dental profession in many, many ways. When we consider the leadership and innovations that have evolved from USC, we realize that our faculty, students and alumni have advanced our understanding of gnathology and principles of occlusion, developed new techniques and materials for restorative, surgical and preventive dentistry, and provided leadership in addressing the issue of access to care for underserved children. Our researchers have advanced our knowledge of underlying disease processes and made discoveries that will continue to shape the future of the oral health profession. USC has produced some of the country’s finest dentists, hygienists and specialists, and many leaders in the profession at the local, national and international level.

“Celebrating the Past, Shaping the Future” is part of the University of Southern California’s celebration of its 125th anniversary. It is part of the annual USC Homecoming Weekend and precedes our annual homecoming reception for USC dentistry alumni and friends that will be held at the California Science Center immediately following this day-long symposium. This is an opportunity you won’t want to miss. I look forward to welcoming the entire dental school community to what is sure to be an incredible event.

Harold C. Slavkin, Dean
The G. Donald and Marian James
Montgomery Professor of Dentistry

8:00 am - 8:30 am

Registration

8:30 am - 9:30 am

As The Future Catches You (The Patterson Keynote Lecture)
Juan Enriquez

4:00 pm - 5:00 pm

Summary and Closing Remarks
Dean Harold Slavkin

KEYNOTE LECTURER

JUAN ENRIQUEZ (Keynote Lecturer)
Founder & CEO, Biotechonomy
Author, *As the Future Catches You*

Juan Enriquez is one of the world's pre-eminent authorities on the economic and political impacts of the life sciences. He is the author of the global bestseller *As the Future Catches You: How Genomics & Other Forces are Changing Your Life, Work, Health & Wealth*. Energetic and articulate, Juan is a fine speaker with a

unique message that he tailors to each audience. He can speak on which advances in the life sciences will matter to your firm and industry and give you strategic insights into how to turn the life science revolution to your advantage. Fast Company has chosen Juan as one of their Fast 50 for 2005. Mr. Enriquez is Chairman and CEO of Biotechonomy, a company that researches and funds startups that are working to develop the promise of the genomic revolution.

Before founding Biotechonomy, Mr. Enriquez was the Founder and Director of Harvard Business School's Life Science Project. HBS chose Mr. Enriquez as one of its best and most charismatic teachers and showcased his work in its first set of faculty products. He is widely published in the mainstream press and academic journals. Juan participated in a landmark world discovery voyage to sample microbial genomes throughout the world's oceans led by Craig Venter, who sequenced the human genome. He serves on a number of boards and has held several government positions in Mexico.
