# Oral Medicine Symposium: *The Future is Now!*

**LAX Crown Plaza Hotel,  
Los Angeles  
Friday - Saturday,  
November 5 - 6, 2004  
8:00 a.m. - 5:00 p.m.**

The Southern California dental community is fortunate in that the American Academy of Oral Medicine in conjunction with the University of Southern California School of Dentistry have elected to hold a major symposium in Los Angeles this year. This two-day symposium assembles the best experts in the discipline of Oral Medicine and Orofacial Pain from around the United States. The program will focus on a wide range of topics in Oral Medicine including: Oral cancer and the latest in genetics; How to move to the next level in neoplasia detection in your practice; Recognizing and managing viral, fungal, bacterial, salivary and autoimmune diseases of the mouth; Using the electronic medical record and exciting new methods of screening patients for medical risk and finding undetected disease using a computer-patient interface.

In the area of Chronic Pain, speakers will review the following: Phantom tooth pain; Burning mouth syndrome; Neuropathic disease; Myofascial trigger points and botulinum toxin and local anesthetic injections for pain. As you can see, this will be a comprehensive state-of-the-art symposium specifically designed to advance the knowledge and skills of the 21st century dental practitioners.

We are proud to present our panel of 12 speakers who are among the best in the world. They will share with you their professional secrets and expertise in order to take your practice to the next level of excellence ensuring complete oral health. Finally in addition to sharing their extensive knowledge with the audience, this very symposium is to announce and celebrate the opening of USC's new two-year Orofacial Pain and Oral Medicine Residency program and Treatment Center.

Don't miss this event! We are looking forward to seeing you in this course.

## Upon completion you will be able to understand:

- How genetics will affect what we do in next 5 years
- Oral cancer: optimal early detection by the dental team
- Biopsy, dyes, lights, lasers, brushes & chemoprevention
- New concepts on oral bacterial and oral Viruses
- Electronic medical/dental records and medical screening
- Update on anti-virals, anti-bacterials and anti-fungals
- Management of persistent oral ulcers and inflammatory lesions
- Drug-related mucosal disease changes
- Salivary disease, salivary diagnostics and oral health
- Oral sensory diseases including burning mouth syndrome
- Myofascial pain: pathobiology of trigger points & botox
- Orofacial neuropathic pain: neuropathy and phantom oral pain
