Making Sense Out of Removable Partial Denture Design

Saturday, April 9, 2005 • 9:00 a.m. - 5:00 p.m.

HANDS-ON WORKSHOP

7 Hours of Continuing Education

**Timothy R. Saunders
DDS, FAAMP**

Dr. Saunders is Professor of Clinical Dentistry and Group Practice Director, Division of Primary Oral Health Care, USC School of Dentistry. He spent twenty-four years actively practicing and teaching prosthodontics and maxillofacial prosthetics in the United States Air Force. He is a Diplomat of the American Board of Prosthodontics and a Fellow and Past-President of the American Academy of Maxillofacial Prosthetics.

SYNOPSIS

In this comprehensive, state-of-the-art, hands-on workshop, Dr. Saunders will review treatment-planning guidelines as well as principles of design for removable partial dentures. You will have the opportunity to review a patient case for a removable partial denture and assist in the design process, applying the principles discussed by Dr. Saunders. You will also have the opportunity to work at USC's famous "Sim-Lab," one of the most modern and realistic simulator facilities in California.

Upon completion of this course you will be able to:

- Recognize the critical importance of patient examination
- Understand the importance of proper case selection
- Identify multiple clinical factors assisting in removable partial denture design
- Become familiar with a variety of removable partial denture design approaches
- Appreciate that there is more than one design concept suitable for any given situation

USC's famous Sim-Lab

Course participants are required to bring: patient diagnostic casts and pertinent patient information, such as radiographs, record of existing and/or proposed restorations or extractions, periodontal status, and other patient information that may assist in the design of the removable partial denture, as well as a surveyor, if possible.

REGISTRATION FEES

Before March 15, 2005

Dentist: \$395

After March 15, 2005

Dentist: \$425
