SPEAKERS

Linda C. Niessen D.M.D., M.P.H., M.P.P.

Dr. Niessen serves as Vice President of Clinical Education at DENTSPLY International. Dr. Niessen also holds a faculty appointment as Clinical Professor in the Department of Restorative Sciences at Baylor College of Dentistry, a member of the Texas A&M Health Sciences Center, in Dallas, Texas, USA. She has over 80 publications and is the author of a textbook titled "Geriatric Dentistry: Aging and Oral Health". She provides patient care at the Department of Veterans Affairs North Texas Health Care System in Dallas. She is a diplomate of the American Board of Dental Public Health and a diplomate in Special Care Dentistry. Dr. Niessen serves as President-elect of the Dallas County Dental Society.

Mahvash Navazesh, DMD

Dr. Navazesh is an Associate Professor and the Chair for the Division of Diagnostic Sciences at the USC School of Dentistry. Dr. Navazesh received her DMD degree from the University of Pennsylvania, as well as her certificates in General Practice, Oral Medicine Residency and Clinical Research Investigation. Over the past 20 years she has focused her research interest on salivary gland hypofunction. She has published papers on criteria for definition, diagnosis and assessment of xerostomia and has compared methods for collection and stimulation of whole mouth saliva.

Terence E. Donovan D.D.S.

Dr. Terry Donovan received his D.D.S. from the University of Alberta in 1967, and practiced full time in Regina, Saskatchewan for 13 years. He received his Certificate in Advanced Prosthodontics from the University of Southern California in 1981. He is currently Professor and Director of the Advanced Education in Prosthodontics Program at USC, as well as Co-Director for Division IV: Primary Oral Health Care. He is Past Chairman of the American Dental Association's Council on Dental Materials, Instruments and Equipment.

SYNOPSIS

Men may be from Mars but women have two x chromosomes. Gender-based biology is identifying the role female hormones play on various aspects of oral health. This program examines oral health throughout a women's life. From puberty and adolescence through young adulthood, to middle and older adults, this seminar will discuss oral diseases and conditions affecting girls and women from the common (caries, periodontal diseases) to the uncommon (eating disorders, Sjogren's syndrome, HIV/AIDS, TMD, and domestic violence). This multidisciplinary program will address risk factors and how to identify them clinically. In addition, strategies for effective prevention and treatment modalities will be discussed.

At conclusion, participants will be able to:

- Define women's health as it applies to oral conditions and diseases
- Identify examples of systemic diseases presenting differently in women and the implications for oral health
- Understand the oral manifestations and management of diseases and conditions such as TMD, domestic violence, elder abuse, Sjogren's syndrome, HIV/AIDS, anorexia/bulimia, and burning mouth
- Identify risk factors and develop preventive strategies for women at high risk for caries, periodontal diseases, or oral cancer
- Become familiar with autoimmune and immunodeficiency disorders, perform diagnostic work up and interpret test results
- Know the state-of-the-art techniques for restoration of the worn dentition
- Diagnose and manage gastro-esophageal reflux disease
- Know what and when to refer

REGISTRATION FEES

Before July 1, 2005

- Dentist: \$175
- Auxiliary: \$115

After July 1, 2005

- Dentist: \$195
- Auxiliary: \$135

Register At The Door

- Dentist: \$215
- Auxiliary: \$155
