COMPREHENSIVE SURGICAL & RESTORATIVE IMPLANT TRAINING PROGRAM

COURSE A: SEPTEMBER 9 - 11, 2005
OCTOBER 7 - 9, 2005
NOVEMBER 18 - 20, 2005

COURSE B: DECEMBER 9 - 11, 2005

COURSE C: APRIL 21 - 23, 2006

COURSE D: JUNE 2 - 4, 2006

- ★ Lectures
- ★ Hands-on workshops on implant surgery and prosthetics
- ★ Live surgery and restorative case demonstrations

COURSE B

PREDICTABLE OUTCOMES IN IMPLANT THERAPY BASED ON BIOLOGIC PRINCIPLES

SPEAKERS

Dr. Yoshihiro Goto, Dr. Clark Stanford, Dr. Homayoun Zadeh

OVERVIEW

The long-term success of implant-supported prostheses requires an evidence-based approach to therapy. This 3-day course consists of lectures, hands-on workshops and live surgery demonstration and is designed to supplement the knowledge of biologic principles, as well as technical skills, which are the prerequisites of achieving predictable outcomes in implant dentistry.

EDUCATIONAL OBJECTIVES

Conceptual topics

- Factors affecting the stability of the peri-implant tissues
- Influence of implant component design on esthetic outcome

Diagnosis and treatment planning

- Treatment planning and case selection:
 - Single-unit tooth replacement
 - Multiple-unit tooth replacement
 - Fully edentulous patients
- Diagnostic tools: radiographs, CT scan, tomography
- Surgical guides: lab fabricated and computer-generated surgical guides

Surgical placement of implants

- Surgical considerations and treatment planning
- Hands-on workshop: participants will place implants in models
- Live surgery: participants will observe implant placement in patients
- Preservation & augmentation of hard & soft tissues

Implant prosthetics

- Implant restorative options
- Implant impression techniques
 - Hands-on workshop
 - Live patient demonstration

- Abutment selection: prefabricated abutments, computer designed abutments, ceramic abutments
- Immediate vs. staged implant placement
- Immediate vs. staged implant loading
- Provisional placement: immediate vs. staged

Laboratory techniques and procedures

Who will benefit from attending this course:

This course is appropriate for any clinician who is interested in gaining a comprehensive training in implant dentistry:

- Clinicians with previous implant experience who would like to learn additional implant systems
- Surgical specialists who would like to acquire a more in depth and comprehensive understanding of implant restoration
- Restorative dentists who would like to acquire a more in depth and comprehensive understanding of implant surgery
- Allied health professionals (Laboratory technicians, dental hygienists and dental assistants) who participate as members of the implant therapy team and would like to be more effective in their functions by enhancing their fundamental and practical knowledge

LOCATION:	USC School of Dentistry
DATES:	Friday - Sunday, December 9 - 11, 2005
TIME:	9:00 a.m. - 5:00 p.m.
COURSE FEE:	Before November 15, 2005 ▶Dentist: \$1,695 Faculty & Auxiliary: \$895 After November 15, 2005 ▶Dentist: \$1,895 Faculty & Auxiliary: \$995
