SURGICAL ASSISTANT TRAINING

OVERVIEW

Surgical assistants are important members of the implant surgical team. Familiarity with the latest concepts and procedures will facilitate communication and patient care in a successful practice. For more in-depth and comprehensive understanding of implant surgery and restoration, assistants are encouraged to register for course A.

EDUCATIONAL OBJECTIVES

- Introduction to implant dentistry for surgical assistants
- Review of implant terms, components and treatment options
- Patient education, pre- and post-operative instructions
- Preparation of the surgery room for procedure
- Patient preparation for surgery
- Description of instruments and equipments used in implant surgery
- Set-up and handling of surgical instruments, equipment, sterile drapes, and sterile solutions
- Proper techniques of scrubbing for surgery and donning of sterile gowns and gloves
- Sterile instrument transfer and surgical assistance
- Implant maintenance

Who will benefit from attending this course:

This course is appropriate for any allied professionals who are involved in the care of implant patients:

- Clinical assistants who assist during implant surgery
- Implant coordinators involved in planning and coordinating the treatment of implant patients
